WHAT, WHERE, WHEN, AND HOW TO PLANT

A Century of Reliable Service

TO THE GARDENERS OF AMERICA

Dear Friends:

Spring Hill is proud and grateful for its 100 years of continuous growth in America. With the approaching planting season we would like to assist you on your planting problems and needs.

We are happy to send you this 100th anniversary money saving catalog dedicated to our founder, Peter Bohlender, a great pioneer horticulturist whose love for growing plants and progressive thinking were the foundation of what is today the Spring Hill Nurseries Company. It is our desire to conduct all business transactions for customer satisfaction and to retain a friendly feeling so they will be pleased to tell their satisfaction to others.

Today, with complete frankness and honesty, we can say your money will buy more plants of better quality than at any time in our history. Scientific plant selection, plant hybridizing, cultural research and modern equipment have opened a new era in plant world far beyond our fondest dreams. We know you will be completely satisfied if you will order soon from our fine selection of hardy northern grown plants.

We want to thank all our customers and express our deepest appreciation for the confidence and support that has been given Spring Hill Nurseries these many years.

Sincerely yours,

Tom and Howard Kyle

5 Kinds of Apples On 1 Tree

—4A5—Five different apples grafted on one tree. Plant this novelty tree, enjoy red, yellow and striped apples from early to late fall. Interesting and beautiful tree for your yard. Each tree guaranteed a good assortment of varieties listed on page 5. New, low prices, 2 yr., 4 to 5 ft., \$1.89 each; 3 for \$5.35. 5 to 6 ft., \$2.45 each; 3 for \$6.95.

Spring Hill's Early Bearing APPLE TREES

Spring Hill's apple trees are selected from high yielding, improved color strains, renowned for bearing at an early age. Guaranteed blue ribbon quality.

Double Red Delicious—5A1—America's favorite apple. It's properly named for color, wholesomeness, mellowness, flavor and aroma whether for cooking or eating. Our trees are an improved bright red strain descended from the original stock. You cannot buy any better no matter how high the cost. Save at our moderate price for this great variety.

Solid Red Rome Beauty—5A2—For a late keeping and cooking apple it's unsurpassed. A double red Rome Beauty of higher quality with the ability to yield crops. Each year the beautiful red fruit commands the highest prices.

Double Red Winesap—5A3—Highly recommended. This fine, double red winter variety bears young, is a vigorous grower and heavy yielder. The large, red apples are unsurpassed for quality, being a choice eating, table and excellent cooking variety.

Yellow Delicious—5A4—Bears big crops young. Golden apples of same shape, size and quality of the standard Delicious but possibly it excels in bearing qualities and tastiness. For those who like golden apples, Yellow Delicious is champion.

New Lodi—5A5—Our best early apple. Beautiful, large, golden apples. One of the first to bear, ripening 1 to 2 weeks after Yellow Transparent. The fruit is often 2 to 3 times larger than Transparent, does not get soft as quickly and holds on the tree much better. It tastes and cooks just like Transparent.

Wealthy—5A6—The leading summer apple. Brilliant red with green stripes, is of fine quality, the best of its season. Heavy yields each year, bears young, good, sturdy growing, profitable trees. Trees extra winter hardy, does well in Northern climates.

McIntosh—5A7—Bears young, wonderful quality. Nice, big, red apples with snow-white flesh that is tender and

juicy. Fine for cooking and eating. One of our best home and commercial varieties, high yielding and fruit keeps well.

Jonathan—5A8—Excellent for cooking, eating. Among the best for quality, color, size and yields. Brilliant red skin, crisp, tender, juicy with pleasant aroma. Planted extensively in all sections for home use and commercially.

Grimes Golden—5A9—Pleasing spicy flavor. The highest quality, a fancy dessert and fine cooking variety. The large, bright, yellow apples with pink cheeks are fine grained with pleasing flavor. Strong growing, high producing variety.

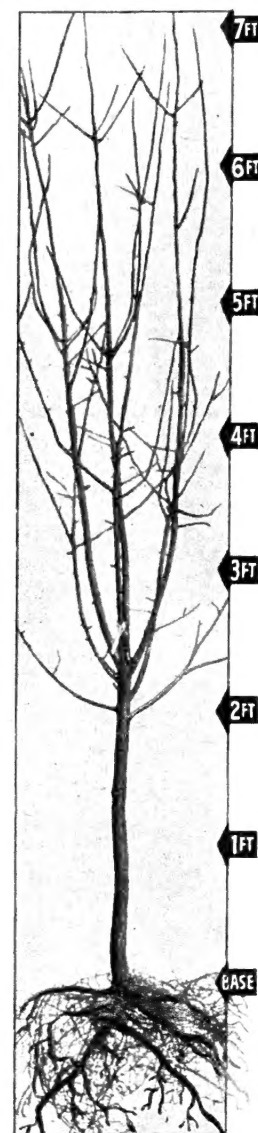

Baldwin—5A10—Favorite for many years. Extensively grown, yields large crops of big, red, crisp, juicy apples that keep into the winter. Esteemed for eating and cooking. For many years a favorite variety.

Rambo—5A11—Prized for eating. The well known dessert variety, famous for flavor and exquisite taste. Spring Hill's jumbo strain ripens in August. The big apples are red striped and often 4 to 5 inches in diameter. Strong growing, vigorous, high yielding trees.

Yellow Transparent—5A12—Earliest, extra good. Beautiful, clear, golden skins, juicy, white flesh, excellent flavor. The trees are extra hardy, grow fast and bear young. The most popular and profitable, early apple. Exceptionally good for cooking.

Stayman Winesap—5A14—Leading winter apple. A champion for size, quality and big crop. Unsurpassed for cooking and eating. Keeps until late winter. A vigorous growing, early bearing, profitable variety.

Dolga Crab Apple—5A15—A new, extra winter hardy variety. Bears young with large, fiery-crimson fruit in greatest abundance. Trees semi-dwarf, beautiful in flower and one of the best pollinating varieties when fruiting.

Declaration of Quality

for **SPRING HILL'S**
Select strain fruit trees

The science of Horticulture proves fruit trees propagated from select strain parent plants (like pure bred livestock) are far superior to ordinary or scrub parent trees.

Keeping records, scouting bearing orchards for bud-wood, high organic soils for root development, etc. cost more, but assure Superior Trees.

**THERE ARE NO BETTER FRUIT TREES
ON THE MARKET**

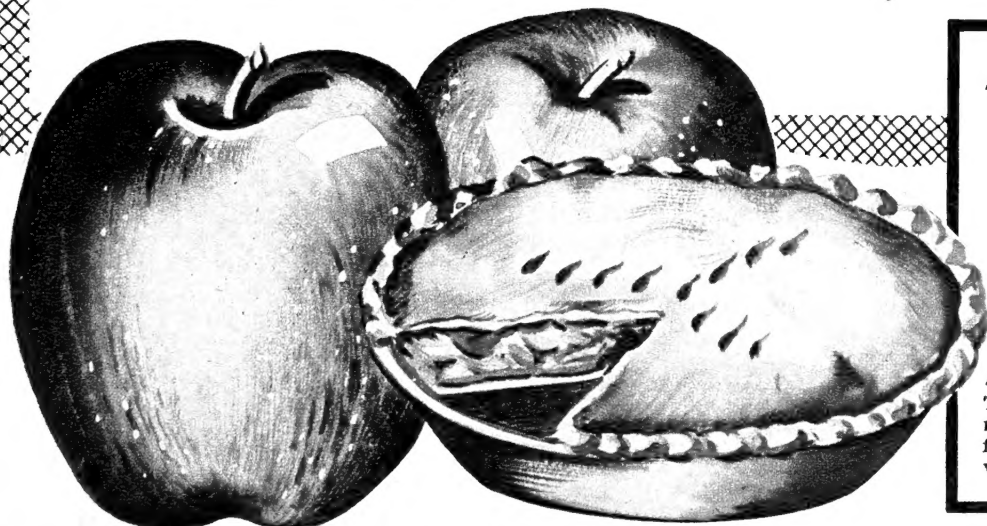

Plant for quick crop, rapid growth, super quality and big yields that pay. "Visit our nursery, see for yourself."

To Whom It May Concern:

All of the apple and pear varieties propagated and now growing in the nurseries of Spring Hill Nurseries Co., Tipp City, Ohio, have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true-to-name as they now stand in the nursery row.

TREE RIPENED PEACHES *Are Best for Quality and Health*

ELBERTA 6P1—(The old reliable, universally planted. Prices and sizes see below.) A big money maker, dependable in all sections. If you plant only one peach, plant Elberta. Fine, big, juicy, red checked, yellow, freestone fruits of unsurpassed quality and flavor. Plant Spring Hill's superior thoroughbred strain Elberta for profits.

EARLY ELBERTA 6P2—(Early, money-making strain. Prices and sizes see below.) The fruit and trees are like Elberta. One of the most reliable, high quality, high yielding early peaches. Fruit from Spring Hill's strain often ripens 10 days ahead of the regular Elberta.

LATE ELBERTA 6P3—(Big Elberta's to prolong the peach season. Prices and sizes see below.) The leading late peach, big, yellow, freestone similar to regular Elberta. Good quality, very productive and a fine canning and freezing variety.

BELLE OF GEORGIA 6P4—(Finest flavored, white flesh. Prices and sizes see below.) Beautiful, big, red blushed, freestone fruits with creamy white flesh. One of the finest flavored peaches that grows. Trees strong growing, hardy and productive. Best to thin, as trees tend to overload. Our highest rated white peach by commercial growers.

J. H. HALE 6P5—(Extra large, handsome quality fruit. Prices and sizes see below.) Superb texture, flavor, color and largest size. Stem is yellow, deeply red blushed, nearly fuzzless. Spring Hill's strain ripens a few days earlier than Elberta. Hardy, high yielding, yellow freestone. An old favorite and one of the best home orchard varieties.

NEW RED HAVEN 6P6—(A grand peach for home or orchard. Prices and sizes see below.) A profitable commercial and excellent home variety. Extra early, ripens a month ahead of Elberta with brilliant red color, fine sweet, juicy flavor, perfect freestone, medium to large size, smooth skin, bears big crops. New Michigan Experiment Station variety, thoroughly tested by hardiness and yields.

GOLDEN JUBILEE 6P7—(One of the best early ripening peaches. Prices and sizes see below.) Extremely hardy, a sure cropper after severe winter. Medium large in size with beautiful amber-gold color and honey sweet flavor. Ripens 3 weeks ahead of Elberta. Profitable commercial and excellent for home plantings.

HALE HAVEN 6P8—(New premium variety all should plant. Prices and sizes see below.) Nationally the most satisfactory and successful new peach. Introduced by Michigan Experiment Station and considered the greatest variety introduced since Elberta. Bears two weeks before Elberta, is extra bud hardy and the most dependable yielder on the market. Nice, big, highly colored, golden, freestone fruits of superb quality. You cannot go wrong planting this variety.

PLUMS FINEST HARDY VARIETIES

HISTORY OF OUR BUSINESS

Peter Bohlender Stayed Home While Gold Miners Rushed West to California

In 1849, Peter Bohlender, a poor, young immigrant from Bavaria with no formal education, began growing fruit trees near Dayton, Ohio. Although he founded Spring Hill Nurseries with the smallest of shoe string beginnings he soon became recognized a leader in Horticulture. People found they could depend on his plants. These people told their friends and slowly but surely the fame of the nursery spread.

Today in 1949 we have one of the largest and most modern nurseries, producing over one million plants each year which are shipped to every state in the union.

W. F. Bohlender, son, and H. N. Kyle, son-in-law, assumed active management for 33 years. In 1929 Tom Kyle completed his Horticultural schooling at O.S.U. and entered the business as production manager. In 1937 Tom and Howard Kyle, grandsons of the founder, assumed full ownership and management. For three generations or 100 years, the business has been continuously operated. Each generation has had a natural love for plants and all grew up working in the fields.

Plums are easy to grow, often bear big crop 2nd year.

STANLEY PRUNE—8P1. Best for Home or Commercial. This new winter hardy prune is universally the best. Ripens ten days earlier. More thrifty, rapid growing and more productive. Extra large, deep, bluish-purple, sweet, firm and excellent quality.

BURBANK—8P2. Big, bright red plum. Profitable because of big crops, bears young. Trees hardy, vigorous, grow successfully in all sections. Fruit large and of excellent quality, cherry red.

GREEN GAGE—8P3. Delicious, sugary flavor. Nice, big, yellow-green, round plums in great abundance. Because of its rich flavor one of the best for canning and eating. Hardy and productive.

GIANT PRUNE—8P4. Big, blue, freestone. Great big, dark purple with bright blue overcast and sweet, mellow, yellow flesh. Prolific bearer of heavy crops each year.

DIRECTIONS FOR PLANTING FRUIT TREES

Trees should be planted immediately after opening package if possible. Keep roots covered with damp cloth. Do not expose to sun and air. (See cut opposite.) Dig hole large enough so that roots will not be crowded. Make separate pile of fertile top soil. Tree should be planted two inches deeper than grown in nursery. (Notice old soil mark around tree.) Put fertile top soil around roots, breaking up so that there are no air pockets. Fill hole about two-thirds full, pressing earth down firmly. Water well. Fill hole to top. First year a mulch of well-rotted manure or compost should be used to hold moisture and build fertility. Do not let fertilizer or manure come in contact with roots or body of tree.

HOWARD'S MIRACLE PLUM

Acclaimed the most sensational tasting new fruit introduced in many years. Extra large, firm flesh of striking amber color; thin skin and miraculous flavor. Ripens for long period in July and August. Trees usually have big crop 2nd year and are fast growing but mature into small trees for home garden. Hardy where peaches grow.

Registered Raspberries

Propagated by the Ohio Small Fruit Improvement Association. Almost disease free; every plant individually hand tipped, graded and dug by members of the Association under strictest inspection and regulations permitting 1% or less virus disease and not more than 1/4% of gall in parent plants. Spring Hill does not recommend you purchase these extra quality plants unless you can plant them away from uninspected raspberries. An isolated patch with proper care will far outyield ordinary plants and remain healthy for years. We can supply Bristol, Logan, Cumberland and Giant Latham in registered plants.

Prices of registered raspberries, all top grade and size plants.

Blackberries • Dewberries • Elderberries

Eldorado Blackberry—12B14—Universally accepted, hardiest dependable variety. Eldorado bears big crops on young plants. Extremely winter hardy, vigorous growing and productive fruiting over a long season. Large berries of fine flavor and texture unsurpassed for quality. Highly recommended for home or commercial plantings. No. 1, 6 for \$1.15; 12 for \$1.65; 25 for \$3.25; 100 for \$9.45. Bearing age, 2 yr. transplants, 3 for 85c, 6 for \$1.50; 12 for \$2.50; 25 for \$4.50.

New Alfred Blackberry—12B15—Almost coreless, a fine high yielding blackberry. Usually ripens a week to ten days earlier than other varieties. Noted for absence of seeds and core, immense size, sweet and delicious flavor. A good, hardy variety for home and commercial planting. No. 1, 6 for \$1.25; 12 for \$1.75; 25 for \$2.85; 100 for \$9.60.

Lucretia Dewberries—12B16—The most desirable and profitable early berry. Berries are larger than blackberries and the first to ripen, often two weeks ahead of all other berries. Big, glossy, black fruit, unequalled for eating and canning, brings high market prices and are a real enjoyment in the home garden. Disease free and easy to grow. No. 1 size, 6 for \$1.10; 12 for \$1.55; 25 for \$2.45; 100 for \$8.75.

Elderberry—12B17—Adam's giant improved. Easily grown, fine, tall, ornamental shrub for your yard or garden. Tremendous quantities of extra large berries on big clusters. Mr. Adams perfected this new variety which is regarded as the finest elderberry in existence; far superior to wild and common varieties. Many people like them for sauces, pies, preserving and nothing makes better wine. Big bearing size, 3 ft., 65c each; 3 for \$1.75; 6 for \$3.30; 25 for \$11.95.

Hardy GARDEN PLANTS

Washington Asparagus 13A1

Big, annual crops, easy to raise. Giant, rust-resistant strain, ahead of others in size, tenderness and long cutting period. The leading asparagus. The first fine vegetable of spring. Like sweet corn, it is best when cut from your own garden and cooked immediately. Grow it as a beautiful ornamental plant if you have no vegetable garden.

New Paradise Asparagus 13A2

A grand new variety, producing younger and heavier than any other asparagus. The stems are large, tender and green like Washington, even milder flavor. Spring Hill strongly recommends Paradise as a new money-maker and a better variety that deserves all its acclaim and popularity. If you have only a limited space, plant Paradise; it yields so heavily.

Early Spanish PEANUTS

13P11 — Grow Peanuts in the North. Plant in light soil. Lime soil if acid. Shell nuts so as not to break skin and plant in rows 3 feet apart, spacing nuts 8 to 10 inches apart. If hill planted, space 16 inches by 16 inches. Dig before frost and hang vines to dry. Peanuts are shipped in shell to prevent damage. 1 pint 30c; 1 quart 50c; 3 quarts \$1.10; 6 quarts \$1.95.

Giant Blueberries

New giant U. S. Dept. of Agr. cultivated blueberries famous for size, flavor, profit, and beauty. The attractive plants are beautiful in flower and are handsome, dwarf, glossy foliaged shrubs. The beautiful clusters of pink buds and white bell-shaped flowers are followed by the sapphire blueberries in big clusters, often as large as grapes. Two or more varieties should be planted together for good yields. Blueberries require acid soil. If soil is sweet or alkaline, use peat moss or decomposed vegetable matter mixed with aluminum sulphate. The period of ripening covers several weeks. Plants last a lifetime and have no thorns. Easy to pick. Your choice of 13B12 CABOT—early; 13B13 RANCOCAS—mid-season; 13B14 JERSEY—late.

New Thornless ROSE

FESTIVAL 18R2

(U. S. Patent No. 545)

The everblooming thornless red hybrid tea rose. A brilliant sport of the famous E. G. Hill. All the hardiness, good growing qualities and prolific blooming habit of its ancestor but with the new quality of having canes free from thorns. Truly the marvel of the age in rose development. Brightest red color and will begin blooming in six to eight weeks after planting. Produces abundantly from then on until freezing fall weather. We offer only 2 year. No. 1, field grown and budded plants. \$2.00 each; 3 for \$5.00. Postpaid.

Outstanding FLOWERING and ORNAMENTAL SHADE TREES

Indispensable for cool, peaceful avenues and colorful plantings.
Nothing more picturesque than your home framed with beautiful trees.

Lombardy Poplar

22T1—(Fast growing) New, reduced prices. A stately avenue tree of rapid growth with glossy pear-shaped leaves that seem to shimmer in the sunlight. Excellent for group plantings, along driveways or as tall screens or hedges. Extra heavy 6 to 8 ft. trees, \$1.49 each; 3 for \$3.75; 6 for \$6.98. 3 to 4 ft. trees, 3 for 79c; 6 for \$1.35;

European Mt. Ash

22T3—(*Sorbus Aucuparia*)—One of our most attractive semi-dwarf trees. Grows fast when young, but never gets big. Beautiful orange-scarlet berries each fall, handsome foliage. Nice, 2 yr. plants, 3 ft. size, 55c each; 2 for 95c; 6 for \$2.35.

Instructions For Planting Trees

If possible, plant trees immediately on arrival. In any case keep roots moist. Do not expose to sun and air. 1. Dig hole large enough so that roots will not be crowded, plant 2 inches deeper than soil marks at base of tree. 2. Fill hole half full of rich top soil, firm well and fill hole with water. When water has drained away, fill remainder of hole with balance of dirt. 3. Prune top well back as this helps tree to grow. About once a week water until soil is completely saturated. Wrap trunk with burlap or paper to prevent sun scalding and borers. If tree is large and shaken by wind, stake tree. See illustration at right.

American Red Bud

22T4—(*Cercis Candensis*)—Bright, rosy, sweet-pea like flowers in April and May. Beautiful native, hardy, dwarf flowering trees, for ornamental plantings. 2 ft. size, 2 for 61c—see 1c sale below. 3 yr., 3 ft. size, \$1.00 each; 3 for \$2.70.

Clinging Wall Vine (*Euonymus Colorata*)—23V16—

Climbs brick or concrete walls without support. A wonderful evergreen, clinging vine, valuable for covering foundations. Extremely hardy and easy to grow. Handsome glossy green leaves winter and summer. 2 yr., 50c each; 3 for \$1.25.

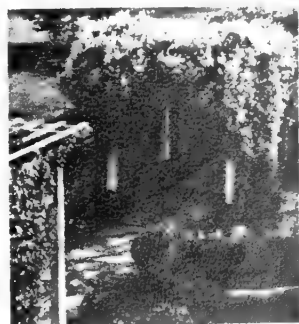

Their uses are many. Unsightly banks, fences, buildings, etc., can be beautiful at a small expense. A sunny porch made cool; a plain front porch appears as if draped with expensive petaled curtains. All vines listed are permanent, winter-hardy and they will establish themselves and grow much faster if planted this spring.

Purple Wisteria—23V12—Grafted, guaranteed-to-bloom plants. Magnificent lavender, sweet-pea shaped flowers in clusters often a foot long. Vines 3 yr., 2 to 3 ft. \$1.25 each; 3 for \$3.45. 2 yr., 75c each; 3 for \$1.95.

Scarlet Honeysuckle Vine—23V14—Extra large flowers of scarlet with gold throat in nice clusters all summer. Fast growing. 2 yr., \$1.00 each; 3 for \$2.75.

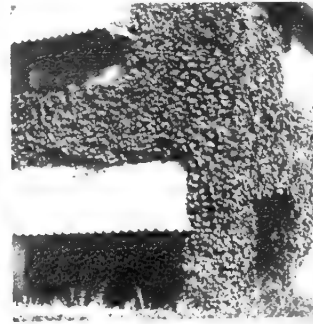

I am very well pleased with my shrubbery and evergreens.

Mrs. Nettie Rhoades Mowrytown, Ohio

Silver Lace Vine (*Polygonum Auberti*)—23V17—

Covered with sprays of silvery-white flowers in the spring and fall. Foliage clean, not bothered by insects and flies. Blooms first season, perfectly hardy and extra fast growing. 2 yr., No. 1 blooming size, 65c each; 3 for \$1.79.

Boston Ivy (*Ampelopsis Veitchii*)—23V18—

Clings to brick, stone or concrete. Grows rapidly. Glossy green leaves turn brilliant orange-scarlet. 3 yr., Deluxe grade, 75c each; 3 for \$1.98. 2 yr. medium 49c each; 3 for \$1.35.

Orange-Crimson Trumpet Vine (*Bignonia*)—23V15—Rapid growing, climbing plants with an abundance of trumpet-shaped flowers of glowing orange-crimson. 2 yr., 40c each; 2 for 75c.

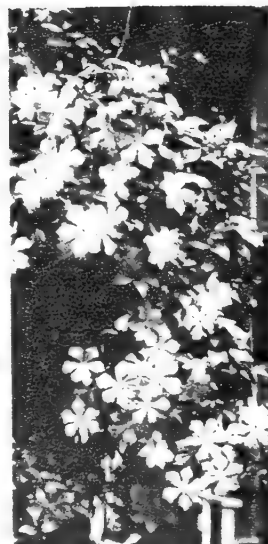

Blue Jackmanii—23V13—The most popular variety. Velvety purple flowers. Blooming age, 98c each; 3 for \$2.75.

White Henryi—23V22—Extra large, creamy-white flowers, free flowering. \$1.15 each; 3 for \$3.10.

Fragrant Honeysuckle Vine—23V19—

An evergreen vine fast growing, disease free and hardy. Fragrant creamy-white flowers. Our most popular ground cover for erosion control. Write for 1,000 lot prices. 2 yr., 35c each; 3 for 95c.

World's Finest Large Flowering Clematis Red Jackmanii (*Ed Andre*)—23V20—

The standard red. Nearest to scarlet. \$1.10 each; 3 for \$2.95.

Clematis White Henryi and Blue Jackmanii (See above)

White Cluster Clematis—23V21—

Small, white flowers, cottony seeds. Attractive from summer until late winter. 2 yr., 49c each; 3 for \$1.25.

Quality GRASS SEED

Inferior seed is costly in the long run. Spring Hill offers only the better grades at moderate prices. Early spring from March to June is one of the best times for renovating; rebuilding or making a new lawn. The cool moist weather makes the grass grow fast and it stools or spreads out better than at any other time of year. PLANT NOW FOR BEST RESULTS.

Spring Hill's Deluxe Evergreen Mixture—28S12—

Exceptionally high quality, one of the three finest mixtures in America. Highest germinating fresh crop seeds with more per pound. Practically no weed seed or inert matter. This blend is the result of years in testing formulas. Plant for a quick steady turf. 1 lb. \$1.15; 3 lbs. \$3.30; 10 lbs. \$10.50; 25 lbs. \$25.00; 100 lbs. \$95.00.

Fancy Kentucky Blue Grass—28S13—

Our most dependable and hardiest, easy to grow variety. Recommended for reseeding old lawns and pastures. It is economical to buy finest weed-free germinating seed. 1 lb. 90c; 3 lbs. \$2.55; 10 lbs. \$7.95; 25 lbs. \$19.50; 100 lbs. \$75.00.

Standard Evergreen Mixture—28S14—

Made from practically the same formula as below. Will produce a beautiful weedless lawn in two to four weeks. Permanent or hardy grasses predominate in ratio of four to one considered ideal by experts. Used extensively by parks, cemeteries and golf courses. 1 lb. \$1.00; 3 lbs. \$2.85; 10 lbs. \$8.95; 25 lbs. \$21.25; 100 lbs. \$80.00.

ROSA MULTIFLORA • The Miracle Asiatic Shrub

A Practical Living Farm Fence

Rosa Multiflora—29H10—A cheap, stock-tight fence, quick at 40¢ less cost than woven wire fence. Do not compare with the old time space and labor wasting osage orange hedge. Multiflora rose is different plant as a permanent hedge but you need not trim and if you ever want to move hedge it is quickly destroyed with 2-4-D or by clipping.

The easily grown plants make excellent cover, nesting facilities, and provide winter food for wild life. The natural propagation and successful wintering of game assures a growing supply for sportsmen.

Recognized and developed by U. S. Soil Conservation Service. Trial fences have been planted in the East, South, Middle West and North West and proven successful.

For more detailed description and planting instructions write to the Soil Conservation Service, Elsberry, Missouri.

The attractive plants grow 6 to 8 ft. tall and 5 to 7 ft. wide. Present recommendations are to plant 1 ft. apart in a single row for livestock fence. The general use of Rosa Multiflora is just beginning but its value for cheap fence, game management, windbreak, protection to soil and crops will last for generations.

Big demand, limited supply. We suggest early orders.

Evergreen Packing Charges

Evergreens will be dug with bare roots; puddled in mud and
trapped in wet moss for shipment. B&B means balled and bur-
rapped, which signifies plants are dug with solid ball of earth
round roots and held in place by firmly wrapping with burlap.
If you wish plants dug and shipped B&B, add 75c extra per plant
or Large Landscape size and 40c each extra for B&B Junior
landscape size to cover added expense for packing.

How To Plant Evergreens

Plant evergreens immediately upon
arrival as they have resin in their sap.
Keep from sun and air. Dig hole 8 to 10
inches larger than the ball of earth or
root spread. Set evergreen 1 to 2 inch-
es deeper than soil marks on the trunk
of the evergreen. Fill hole half full
of rich top soil, firm well, then fill hole
with water.
